

Privacy Policy for Ensemble Plugin

1. Introduction

Ensemble Plugin (“we”, “our”, or “the extension”) is a browser extension designed to provide financial analytics, reporting tools, and visualizations directly within the user’s existing workflow. We are committed to protecting your privacy and ensuring transparency about how data is handled.

This Privacy Policy explains what information the extension collects, how it is used, and your rights as a user.

2. Information We Collect

The Ensemble Plugin is designed to operate with minimal data collection. The extension does NOT collect, store, sell, or share any personal information.

a. Data Processed Locally on Your Device

All analytical actions—such as mapping fields, uploading data from CSV/API, or generating visual reports—happen locally in the browser. The extension does not transmit your data to external servers unless you explicitly upload data to your existing Ensemble environment or API.

b. Temporary Access to Page Content (activeTab)

The extension accesses the current tab only when you activate it, solely to:

- Render analytics UI
- Read field names for mapping
- Display visualizations

3. How We Use Information

The extension processes data only to perform analytics within your current session, such as:

- Reading selected analytical fields
- Mapping data
- Generating calculations
- Displaying reports

4. Third-Party Services

The Ensemble Plugin does not use third-party tracking, analytics, cookies, or external SDKs.

5. Bookmarks and Favorites

If you use the Favorites feature:

- Bookmarks are stored only in your local Chrome profile.
- Created only when you manually save a Favorite.
- Not uploaded or shared.

6. Permissions Explained

The extension requests only necessary permissions:

- scripting — to insert plugin UI
- activeTab — to show analytics on the current page
- bookmarks — to save Favorites
- contextMenus — to enable shortcuts
- host permissions — to integrate with your financial systems

7. Data Sharing and Selling

We do not:

- Sell data
- Share data

- Transfer data
- Use data for advertising
- Track users

8. Children's Privacy

The extension is not intended for users under 13. We do not knowingly collect data from children.

9. Security

All processing is done locally and securely within your browser.

10. Changes to This Policy

Updates may be made periodically with a new "Last Updated" date.
